

EPI&C Systems Inc. has over 45 years of combined experience in the design and supply of burner management packages for industrial heaters and furnaces. EPI&C recognizes the utmost importance of operator, environment, and equipment protection and safety. At the same time, there is a need for system operability, reliability, and cost effectiveness. These are the cornerstones of EPI&C's system designs.

Safety controls on direct-fired heaters have continuously evolved with technology and has accelerated in recent years. This has been due to the introduction of government legislation which actively enforces the application of safety codes and best practices, around the world. Our engineers are well equipped with the knowledge and experience to address the changing safety codes and standards.

The safety systems we have worked with include, but not limited to, ABB, Hima, Siemens, Triconex and Yokogawa. However, our reputation for delivering superior quality and service sets us as one of the leading few companies to finalize Safety Certified Alliance Partnership with Schneider-Electric for the global market.

EPI&C has extensive experience designing and supplying complete and fully integrated burner management systems to clients globally. We have provided systems for single burner to large multi-burner units, from thermal oxidizers to large complex process heaters. Our commitment is to provide the highest service and quality to meet to our clients' requirements.

Companies We Work With

EPI&C System Inc., in cooperation with various fired equipment suppliers, has provided systems to the following end users:

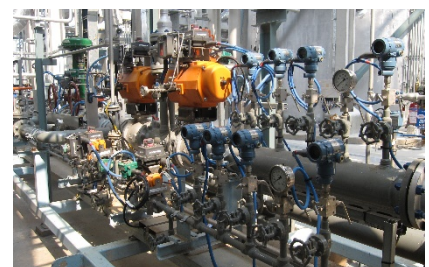

ADCO	Nexen	Shell
PTT	Caltex	Husky Energy
PCS Nitrogen	Chevron	Maersk Oil
Imperial Oil	Conoco Philips	Williams Energy
CNRL	Thai Oil	Talisman Energy
Pertamina	Suncor	IRPC
